# SearchAndReview

Benjamin Munoz

Overview

For this project, I was considering a couple different APIs to interact with, and I decided on the NewsAPI

Using this API, I thought about making an application for searching news articles and then storing the information returned from them for further review.

Tech utilized

Live Demo

Lessons Learned

- How to use jQuery to process AJAX requests
- How to use CSS variables
- How to hide the API key from GitHub
- How to perform Http Requests using the WebClient API in Java

Q&A
